

Strategic Income Fund

E CLASS ACCUMULATION SHARES

Fund Description

The primary investment objective of the Fund is to seek to provide an attractive level of current income, consistent with prudent investment management. The Fund also seeks to provide long-term capital appreciation as a secondary objective.

The GIS Strategic Income Fund is an actively managed portfolio with a global opportunity set that invests primarily in fixed income securities and dividend-paying stocks with flexibility to tactically invest in other income-producing assets. The fund seeks to deliver an attractive level of income and capital appreciation while maintaining a medium-low risk profile.

The Fund seeks to deliver a competitive level of current income and capital growth. Potential benefits of this fund include:

- Employs PIMCO's best income-generating views across global markets to target a consistent distribution
- Employs PIMCO's time-tested investment process and relies on extensive experience in managing income oriented strategies
- Utilizes PIMCO's disciplined, systematic approach to equity investing, seeking to deliver high income and capital appreciation potential

The Fund may use or invest in financial derivatives.

Designed for investors who seek steady income and greater capital appreciation potential.

ABOUT THE BENCHMARK

The MSCI ACWI High Dividend Yield Index is based on MSCI ACWI, its parent index, and includes large and mid cap stocks across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force them to cut or reduce dividends. Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

Hypothetical Growth of 10K

Source: PIMCO. **Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.**

Growth of 10,000 is calculated at NAV and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Share value may go up as well as down as a result of currency fluctuations.

Performance (Net of Fees)	1 Mo.	3 Mos.	6 Mos.	1 Yr.	3 Yrs.	5 Yrs.	10 Yrs.	SI

****Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

**May include nominal and inflation-protected Treasuries, Treasury futures and options, agencies, FDIC-guaranteed and government-guaranteed corporate securities, and interest rate swaps.

***Short duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category.

^AWhere permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds.

Source: PIMCO, index provider for benchmark data.

PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security.

Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.

Dividend is not guaranteed. Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. In the case of the Fund, the Fund may at its discretion pay dividends out of capital which may result in an immediate reduction of the Fund's NAV per share. In the case of Income II Shares, the Fund may at its discretion pay dividends out of capital as well as take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). The management and other fees payable by the Income II Shares may also be charged to the capital of the Income II Shares, resulting in an increase in distributable income available for the payment of dividends and therefore, the Income II Shares may effectively pay dividends out of capital. This may result in an immediate reduction of the NAV per share for the Income II Shares. Please refer to www.pimco.com/sg/en for more information on income statistics.

Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2026 Morningstar, Inc.

All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance is no guarantee of future results.** Investment involves risk including possible loss of the principal amount invested.

Dividends are payable out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

Average Credit Quality (ACQ) - Average Credit Quality (ACQ) is calculated by PIMCO using an internal proprietary calculation methodology and ranges from AAA (highest) to D (lowest); the portfolio contained herein is not reflective of individual ratings by an independent rating agency. ACQ is a market-weighted average of the credit ratings of the credit instruments and holdings which create bilateral counterparty risk, excluding equities and certain other instruments. In calculating the ACQ of a portfolio, PIMCO generally uses the highest of the ratings of S&P, Moody's or Fitch assigned to each issuer held by the portfolio. If an issue or issuer is unrated, it is generally assigned a rating by PIMCO. A significant portion of a portfolio's ACQ may be derived from ratings assigned by PIMCO. ACQ is calculated on a daily basis for each portfolio and will change over time as the ratings for individual securities held in the portfolio change or as instruments are added and removed from the portfolio. In general, instruments are weighted at their market value. Certain derivatives, such as credit default swaps, are weighted at "bond equivalent value," which is the notional amount of the instrument adjusted by the current gain or loss on the position. Certain unrated instruments are not assigned a rating by PIMCO (such as OTC Credit Spreads, Money Market futures, Equity futures, and common stock) and are excluded from the ACQ calculation. This could lead to an under-estimation and under-statement of the credit risk of a portfolio. The portfolio itself has not been individually rated by an independent rating agency. The credit quality of a particular security or group of securities does not ensure the quality, stability or safety of the entire portfolio. PIMCO-assigned ratings used in the calculation may not be representative of PIMCO's current views should the security review have occurred on a date other than the date that this calculation was generated, which will generally be the case, or should an event that could affect a credit rating have occurred. The Fund may use or invest in financial derivative instruments and be subject to various risks (including for e.g. liquidity risk, interest rate risk, market risk, credit risk and management risk etc.) associated with such investments in financial derivative instruments. A Fund's use of, or investment in, financial derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Participation in the markets for financial derivative instruments involves investment risks and transaction costs to which a Fund may not be subject if such strategies are not used. You should carefully consider these risks prior to making an investment in the relevant Fund. Please refer to the Singapore prospectus for more information.

Investment involves risk including possible loss of the principal amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The value of shares of the Fund and the income accruing to them, if any, may fall or rise. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Investors should consider the investment objectives, risks, charges and expenses carefully before investing. This and other information is contained in the Fund's Singapore Prospectus which is available and can be obtained from our website www.pimco.com/sg/en, a Fund distributor or the Singapore Representative. Prospective investors should read the Fund's Singapore Prospectus before deciding whether to subscribe for or purchase shares in any of the Funds. Investors may wish to seek advice from a financial adviser before making a commitment to invest and in the event you choose not to seek advice, you should consider whether the investment is suitable for you.

PIMCO Funds: Global Investors Series plc is an open-ended investment company with variable capital and with segregated liability between Funds incorporated on 10 December, 1997 and is authorised in Ireland by the Central Bank as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 352 of 2011) as amended. PIMCO Funds: Global Investors Series plc has appointed PIMCO Asia Pte Ltd as the Singapore Representative.
