Class: JPM Income Opportunity A (perf) (acc) - USD

Fund overview

ISIN LU0323456466	Bloomberg JPHIOUA LX	Reuters LU0323456466.LUF
Investment objective: To achieve a return in excess of the benchmark by exploiting investment opportunities in, amongst others, the debt and currency markets, and using derivatives where appropriate.		
Investment approach <ul style="list-style-type: none"> • Uses an absolute return oriented approach to target uncorrelated, low volatility returns over the medium term regardless of market conditions. • Flexibility to draw on diversified sources of returns across three distinct strategies: tactical rotation between traditional fixed income sectors, alternative strategies such as relative value trading, and hedging strategies.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

**Performance fee is 20% when the fund return exceeds the benchmark return. Please refer to the Fund's Prospectus for conditions on the application of the performance fees.

Prior to 03/01/22 the benchmark was ICE Overnight USD LIBOR.

Holdings information

Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown.

Data is shown as a percentage of NAV, which reflects leverage taken by the fund.

The yield displayed is in the base currency of the Sub-Fund. Actual share class yields may differ from the displayed yield due to currency effects.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
