

BGF Emerging Markets Local Currency Bond Fund
Class E2 U.S. Dollar
BlackRock Global Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Assets information as at: 31-May-2024. All other data as at 13-Jun-2024.

This document is marketing material. For Investors in Switzerland. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund invests at least 70% of its total assets in fixed income (FI) securities denominated in local currencies of developing market countries and may include investments with a relatively low credit rating or which are unrated. These include bonds and money market instruments (i.e. debt securities with short term maturities) and may be issued by governments and government agencies of, and companies and supranationals (e.g. the Asian Development Bank) domiciled in, or the main business of which is in, emerging markets.
- The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio. This may generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint[†]: J.P. Morgan GBI-EM Global Diversified Index

Asset Class : Fixed Income

Fund Launch Date : 26-Jun-1997

Share Class Launch Date : 15-Jul-2008

Share Class Currency : USD

BlackRock

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

'Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change

In the UK and Non-European Economic Area (EEA) countries: this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Tel: + 44 (0)20 7743 3000. Registered in England and Wales No. 02020394. For your protection telephone calls are usually recorded. Please refer to the Financial Conduct Authority website for a list of authorised activities conducted by BlackRock.

BGF Funds: This document is marketing material. BlackRock Global Funds (BGF) is an open-ended investment company established and domiciled in Luxembourg which is available for sale in certain jurisdictions only. BGF is not available for sale in the U.S. or to U.S. persons. Product information concerning BGF should not be published in the U.S. BlackRock Investment Management (UK) Limited is the Principal Distributor of BGF and may terminate marketing at any time.
