

Schroder International Selection Fund Emerging Markets Value

A Accumulation USD | Data as at 31.08.2023

Fund objectives and investment policy

The fund aims to provide capital growth in excess of the MSCI Emerging Markets (Net TR) index after fees have been deducted over a three to five year period by investing in equities of emerging markets companies that have suffered a severe set back in either share price or profitability.

Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KID.

This fund does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). Any references to the integration of sustainability considerations are made in relation to the processes of the investment manager or the Schroders Group and are not specific to the fund.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Risk considerations

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Higher volatility risk: The price of this fund may be volatile as it may take higher risks in search of higher rewards, meaning the price may go up and down to a greater extent.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Stock connect risk: The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Summary risk indicator (SRI)

The risk category was calculated using historical performance data (or indicative fund performance during periods of suspension) and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Information Document for more information.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund's performance should be assessed against its target benchmark, being to exceed the MSCI Emerging Markets (Net TR) index and compared against the MSCI Emerging Markets Value (Net TR) index and the Morningstar Global Emerging Markets Equity Category. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark and the MSCI Emerging Markets Value (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not have any bearing on how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark or the MSCI Emerging Markets Value (Net TR) index. The investment manager will invest in companies or sectors not included in the target benchmark or the MSCI Emerging Markets Value (Net TR) index in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. Any comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

Benchmarks:

Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.
